When I opened up Excel today I only had one instance of Excelerator. I ran a SQL and it worked. Then closed it down and ran it again and got the same error.
I followed the instructions below. I only saw one instance of Excelerator. I deleted it and started over and I still goet the error. The only odd think I see is that when I walk through the process the first time and close the Excel file I get the runtime error below and it as me do I want to debug. I ignore it and close the file and get when I run the SQL I then get the compilation error. I don't get that runtime error with anything else I use.

Let me know if you can touch base.

Ln 353, Col 1

Project - Snowflake

- LoginForm
- SelectColumnsForm
- SetRoleAndWarehouseForm
- SQLForm
- StatusForm
- UploadDataForm
- Modules
- **Solver (SOLVER.XLAM)**

Subject: Fwd: [Snowflake-Labs/Excelerator] Cannot Clear Excelerator AddIn from Excel (#22)

Cal,

Try this. If you want to get on a call we can walk through it together.

Regards,
Terry

**Subject:** Re: [Snowflake-Labs/Excelerator] Cannot Clear Excelerator AddIn from Excel (#22)

[CAUTION: EXTERNAL SENDER]

Terry,
This can be a little tricky. Excel might ask you to move the add-in to the user directory, so it might be hard to find. It can be stored in this directory
C:\Users<user>\AppData\Roaming\Microsoft\AddIns.
Sounds like you have two add-ins enabled. To delete both of them try this:
1 - Make sure all snowflake add-ins are checked in the add-in config window

2 - Close the add-in window. Go to File --> Options --> Add-ins
You should be able to see where the add-ins are located. Make note of these locations because you will need to delete it in subsequent steps.

Excel Options

General	
Formulas	View and manage Microsoft Office Add-ins.
Data	
Proofing	**Add-ins**
Save	
Language	Name ▲	Location
Ease of Access	**Active Application Add-ins**
Advanced	Microsoft Power Map for Excel	C:\... Excel Add-in\EXCELPLUGINSHELL.DLL
Customize Ribbon	Microsoft Power Pivot for Excel	C:\...Add-in\PowerPivotExcelClientAddIn.dll
Quick Access Toolbar	Snowflakeexceladdin	\\Mac\...kbooks\SnowflakeExcelAddin.xlam
Add-ins	**Inactive Application Add-ins**
Trust Center	Analysis ToolPak	C:\...ffice16\Library\Analysis\ANALYS32.XLL

Add-ins section table:

Name ▲	Location
Active Application Add-ins	
Microsoft Power Map for Excel	C:\... Excel Add-in\EXCELPLUGINSHELL.DLL
Microsoft Power Pivot for Excel	C:\...Add-in\PowerPivotExcelClientAddIn.dll
Snowflakeexceladdin	\\Mac\...kbooks\SnowflakeExcelAddin.xlam
Inactive Application Add-ins	
Analysis ToolPak	C:\...ffice16\Library\Analysis\ANALYS32.XLL
Analysis ToolPak - VBA	C:\...e16\Library\Analysis\ATPVBAEN.XLAM
Date (XML)	C:\...Microsoft Shared\Smart Tag\MOFL.DLL
Euro Currency Tools	C:\...oot\Office16\Library\EUROTOOL.XLAM
Inquire	C:\...ffice\root\Office16\DCF\NativeShim.dll
Microsoft Actions Pane 3	
Microsoft Data Streamer for Excel	C:\...softDataStreamerforExcel.vsto|vstolocal

3 - Go back to the step 1 and uncheck all Snowflake add-ins.

4 - Find all the the add-ins from step 2 and delete them.

5 - Open the Add-in config window in step 1. Check the add-ins and it should tell you that they can't be found and ask if you want to delete it. Say yes.

6 - You should now be able to add the add-in that is unblocked.

Let me know if this works for you.

Steve
